SUPPLIERS SUMMIT 2021

October 12-14, 2021 | St. Charles, Missouri, USA

ABOUT ASPSS

ASPSS is a supply chain event aimed at OEMs and suppliers operating in the field of metalworking and having applications in the commercial aviation and defense industries. The event is based on pre-arranged meetings and reserved for vetted participants. We are expecting an in-person event in St Charles, MO but will be ready to switch it to virtual mode if required by the situation.

ASPSS is not a typical exhibition. It is a matchmaker. Participants will be able to identify and request meetings with relevant contacts and secure one on one meetings prior to the event. Suppliers offering metalwork capabilities and services would be a perfect fit. Whether you work on aluminum, alloys, titanium, steel or other types of metals, ASPSS is a great opportunity to have your products and services seen by OEMs in the industry.

Meet with potential OEM customers involved in:

- Chemical processes
- Heat treatment
- Materials testing and inspection
- Services
- Surface enhancement
- Metal processing

As an event sponsor, the Missouri Department of Economic Development is offering Missouri companies discounted registration and exhibit space in the Missouri pavilion.

SPACE IS LIMITED – REGISTER TODAY!

For questions or to register, visit www.stlouis.bciaerospace.com
or contact Krista Hinrichs, Missouri International Trade & Investment
